

Satisfy Customer Requirements While Maintaining Optimal Inventory Levels Using the Powerful MRP Planning Tool

Generate time-phased manufacturing and purchasing plans for optimal inventory availability tied to forecast and customer demands. Reduce inventory, improve customer service, and avoid shortages and stock-out scenarios that result in costly changeovers and rush orders.

MRP DISPLAY

- This core MRP screen shows the planner precisely what needs to be purchased and produced.
- All supply and demand can be viewed from this one centralized location.
- Production and Purchase Orders can be created directly from this screen.

FULL REGENERATION

- Schedule regeneration to run anytime, day or night.
- All existing planned orders for all items are eliminated.
- MRP starts over, calculating gross and net requirements. It then replans required materials to be produced or purchased.

MASTER PRODUCTION SCHEDULE

- Drive your plan and plant operations from the Master Production Schedule (MPS).
- MRP plans all requirements based upon MPS.
- MPS will be treated as a pre-planned production order acting as the supply for other demand requirements.

KEY BENEFITS

COORDINATE ACTIVITIES

- Manage your entire business with complete, real-time information for your operations
- Coordinate labor, machines, and inventory and optimize your company's processes

STAY ON ONE PLATFORM AS YOU GROW

- Adapt the software to meet your changing needs
- Leverage powerful features and functions for multiple production environments

MRP EXCEPTION MESSAGES HANDLE PROBLEMS WITH EASE

- Shows the planner recommendations to defer, expedite, and delete supply items
- Identify late orders and display any transfers that are available from another warehouse or site

Maintain optimal inventory levels while keeping your customers happy

MATERIAL REQUIREMENTS PLANNING FEATURES AND CAPABILITIES

Forecasting	Forecasts can be calculated or entered manually. These forecasts can be dependent and consumed by sales orders, or they can be independent. Input forecasts as one-time, weekly, monthly, or yearly.
MRP Detail	Review and execute the complete material plan through MRP screens that show all activity, orders, requirements, balances, and recommendations for an inventory item.
Bucketless System	Enhance your manufacturing resource planning by planning every requirement for every item. Acumatica MRP does not ignore detail by grouping requirements together.
Multi-Site	Run MRP for a single site or across multiple locations for a consolidated material plan.
Queue, Finish, and Move Time	Queue, Finish, and Move Time: Improve material requirements planning by defining finish, move, and queue times for operations that require cooling, drying, movement to upstream operations (such as outsourced manufacturing services), and other expected non-production times.
MRP Days Supply	Define planning buckets to consolidate demand into single purchase orders. Planned period sizes are defined by item class, stock item, or item and warehouse combination. Further, a system-wide setting can be defined for planned orders beyond the initial planning horizon for longer-term planning.
Transfers	Balance supply and demand for planned inbound and outbound transfer orders across warehouse locations.
Blanket Sales Orders	Blanket sales order lines for future dates are included in MRP planning as forecasted demand. Blanket release child sales orders are processed as normal sales order demand.

Inventory ID	Description	Type	Ref Type	Related Document	Quantity	Required Date	Promise Date

Exception messages help planners react to late orders and changes with information to optimize material plans.

ABOUT ACUMATICA

Acumatica Cloud ERP provides the best business management solution for digitally resilient companies. Built for mobile and telework scenarios and easily integrated with the collaboration tools of your choice, Acumatica delivers flexibility, efficiency, and continuity of operations to growing small and midmarket organizations. **Business Resilience. Delivered.**
